**Subject:** Hands off my money: Regulation of Retail Forex

---

RIN 3038-AC61

Do not attempt to tell people how they can spend or manage their own money, which they worked for by their own labor. You government buerocrats are engaged in SLAVERY! You are stealing the labor of hard-working Americans with your burdensome regulations and money-printing. You will drive this economy into the ground. After the next election cycle most of you people up there will be out of a job. Get out of the Special Interest business and back into the CONSTITUTION business. Here is some recommended reading for you: <http://www.campaignforliberty.com/pillars/usconstitution.php> You have no authority to regulate the financial market like this and don't give me the "interstate commerce" or "general welfare" nonsense. If you look up the definition of those words at the time they were written they do not say what you would like them to say.

Patriotically,

Michelle L King
