Subject: Regulation of Retail Forex

I am totally disagree with the idea to change the leverage as proposed by **CFTC changes RIN 3038-AC61**.

With this change the CFTC is taking an opportunity for some people to have an extra income to survive in this actual economical crisis.

I believe with this change the CFTC is giving the benefit only to the wealthy people, and I wondering why is that?.

We should be given the freedom and right to choose the amount of leverage that is appropriate for us as individual desired risk.
