Subject: Regulation of Retail Forex

Please do not change the present leverage of 100:1 to 10:1.

The ability for us retail forex traders to make profits without substantial capital rests on the present level of leverage. Reducing the leverage to 10:1 would bar the average middle-class investor from forex trading.

I believe those who mismanage their accounts deserve to be eliminated from trading --- not protected to the detriment of prudent traders.

Thank you for your reading this.
