Comment Text:

I am a small business who is in full support of elections markets coming to the Kalshi exchange for me to hedge on. I run a esports agency business

Esports depend on videogames, economy and markets are with the huge problem of inflation, but nobody cares about this topic now, is most important to eat and basic spending. But people is forgetting videogames will provide work opportunities as you never see before.

Don't exist specific funds for the develop of this field. And everything is giving at the hands of publishers. Just saw problems with the loot boxes

This sector need releave about taxes to grow in a crisis

Students are getting out esports for this reasons

I will knee better in the future.
